

Assignment 1: Introduction

Yunting Wang

OVERVIEW

This exercise accompanies the introductory material in Environmental Data Analytics.

Directions

1. Change “Student Name” on line 3 (above) with your name.
2. Work through the steps, **creating code and output** that fulfill each instruction.
3. Be sure to **answer the questions** in this assignment document.
4. When you have completed the assignment, **Knit** the text and code into a single PDF file.
5. After Knitting, submit the completed exercise (PDF file) to the dropbox in Sakai. Add your last name into the file name (e.g., “Lima_A01_Introduction.Rmd”) prior to submission.

The completed exercise is due on <>.

1) Discussion Questions

1. What are your previous experiences with data analytics, R, and Git? Include both formal and informal training.

Answer: I’ve learned some basics from the Environmental Data Analytic course. Also, I’m now analyzing the experimental data for my MP project using R. However, I’ve never had a systematic training.

2. Are there any components of the course about which you feel confident?

Answer: I’ve taken GIS course last year so I might be more familiar with spatial analysis.

3. Are there any components of the course about which you feel apprehensive?

Answer: I’m worried about whether I can catch up with the coding.

2) GitHub

Provide a link below to your forked course repository in GitHub. Make sure you have pulled all recent changes from the course repository and that you have updated your course README file.

Answer: https://github.com/yw448/Environmental_Data_Analytics_2022.git
